Commission = Order Subtotal × 25.0%
Order Subtotal = Menu price only (excludes: sales tax, tips, Uber Eats delivery fee, service fee charged to customer)

Example: Order subtotal \$55.00 × 25.0% = \$13.75 commission.

3. EXCLUSIONS

3.1 Pickup Orders.

Orders where the customer selects in-restaurant pickup through the Uber Eats platform are expressly excluded from the delivery commission. Pickup orders shall not appear in the commission-applicable line items of any settlement statement.

3.2 Catering.

Catering or event orders submitted through separate enterprise channels are excluded.

3.3 Retroactive Rate Changes.

Commission rate changes shall not be applied retroactively. Any amendment to commission rate takes effect only from the date both parties execute the amendment.

3.4 Unauthorized Rate Escalation.

Application of any commission rate other than 25.0% without a signed rate amendment constitutes a billing error subject to full credit upon merchant request.

4. SETTLEMENT AND PAYMENT

4.1 Settlement Cycle.

Uber Eats remits net order proceeds weekly, typically on Wednesdays for the prior week's completed and delivered orders. Net proceeds = Gross Order Value – Commission.

4.2 Settlement Statement.

A detailed settlement statement is provided weekly in the Uber Eats Merchant Portal, itemizing each order, commission applied, and net remittance.

4.3 ACH Deposit.

Net remittance deposited via ACH. Deposits appear as **UBER* EATS PAYMENT** in Restaurant's bank statement with reference traceable to Partner ID UE-PP-2026-00891.

4.4 Dispute Window.

Restaurant may dispute any commission charge within 90 days of settlement date. Disputes submitted in writing to merchantsupport@uber.com with order ID and discrepancy detail.

4.5 Marketplace Facilitator Tax.

Uber Eats collects and remits sales tax as a marketplace facilitator in applicable jurisdictions. Any difference between POS-recorded order value and Uber Eats settlement value attributable to tax handling does not constitute a billing error.
