2. RATE CALCULATION FORMULA

Effective Rate = Interchange Rate + 0.55% Markup + (\$0.05 × Transaction Count / Volume)

Example (Visa Credit, chip, \$100.00): 1.51% interchange + 0.55% markup = 2.06% + \$0.05 = \$2.11 total fee

Example (Visa Credit, keyed/CNP, \$100.00): 1.80% interchange + 0.55% markup = 2.35% + \$0.05 = \$2.40 total fee

3. CARD ENTRY METHOD AND INTERCHANGE

3.1 Card Present.

Transactions where a physical card is presented and read via chip, swipe, or tap qualify for card-present interchange rates, which are lower than card-not-present rates.

3.2 Card Not Present / Keyed Entry.

Transactions keyed manually qualify for card-not-present interchange rates. Toast shall not classify a card-present transaction as keyed without documented basis from the original transaction record.

3.3 Interchange Qualification.

Toast shall not apply a downgrade to any transaction that meets the qualification criteria for the standard interchange rate without providing documentation of the specific qualification failure in the monthly statement.

4. STATEMENT AND BILLING

4.1 Monthly Statement.

Toast provides a monthly processing statement by the 10th of the following month.

4.2 Fee Collection.

Processing fees are collected via ACH debit from Merchant's settlement bank account, labeled **TOAST EOM [Month]**, processed on the first business day of the following month.

4.3 No Undisclosed Fees.

Toast will not charge any fee not expressly listed in this agreement or in a written amendment signed by Merchant. Any fee appearing on a statement that is not in this agreement or an executed amendment is subject to full refund upon Merchant request.
